

Allen County Key Community Health Indicators

Date: 3/20/2017

MORTALITY¹

Indicator	2015				Healthy People 2020 Target ⁶
	Allen County		Ohio		
Life Expectancy in Years	Female: 79.0 Male: 75.1		Female: 80.2 Male: 75.2		--
Leading Causes of Death	Number	ADR*	Number	ADR*	
All Cancers	271	205.0	25,368	174.8	161.4
Disease of the Heart	234	166.9	28,027	191.4	--
Chronic Lower Respiratory Disease	69	51.6	7,197	49.5	--
Unintentional Injury	45	41.4	6,735	55.8	36.0
Stroke	34	36.4	5,930	40.6	34.8
Other Causes of Death					
Diabetes	37	28.5	3,641	25.2	66.6
Suicide	18	18.6	1,647	13.9	10.2
Motor Vehicle Traffic Deaths	10	9.0	11,991	11.2	12.4
Homicide	4	N/A	670	6.0	5.5
Unintentional Drug Overdoses	18	19.0	3,050	26.3	--

*ADR = Age-adjusted Death Rates

N/A = Indicates rates have been suppressed for counts, rates based on counts <20 are considered unreliable

MATERNAL & CHILD HEALTH²

Indicator	2015		Healthy People 2020 Target ⁶
	Allen County	Ohio	
Infant Mortality Rate (# per 1,000 Live births)	*	7.2	6.0
10-Year Average Annual Infant Mortality Rate	6.8	7.5	--
Teen Birth Rate (# per 1,000 females age 15-17)	14.2	16.5	36.2
Low Birth Weight (% of all births)	10.1%	8.5%	7.8%

*Rates based on fewer than 20 infant deaths are considered unstable statistics

Healthy People 2020 Target not available for all indicators.

COMMUNICABLE DISEASE³

Indicator	2015		Healthy People 2020 Target ⁶
	Allen County	Ohio	
Incidence Rate (# of new cases per 100,000)			
Syphilis (primary and secondary cases)	0.9	4.9	--
Chlamydia	597.4	491.4	--
Gonorrhea	167.1	143.6	--
Diagnoses of HIV infection	10.5	7.8	--
Prevalence Rate per 100,000 population			
Persons living with HIV/AIDS	157.1	192.8	--

UNHEALTHY BEHAVIORS & CONDITIONS⁴

Indicator	2014		Healthy People 2020 Target ⁶
	Allen County	Ohio	
Behavior Prevalence (19 years and older)			
Current smokers	22.0%	22.0%	12%
Rated general health as fair or poor	18.0%	18.0%	--
Condition Prevalence (19 years and older)			
Obese (classified by BMI)	33.0%	30.0%	30.5%
Diabetes	12.0%	11.7%	--
Asthma	10.0%	15.0%	--

INSURANCE STATUS⁵

Indicator	2015	
	Allen County	Ohio
Uninsured (18-64 years)	7.3%	8.8%

Sources & Notes

¹MORTALITY

Source:

Ohio Department of Health Vital Statistics Mortality Data, 2015

Notes:

Data is presented for the top 5 causes of death, other causes of death, and life expectancy among males and females. The number of deaths is presented for each cause of death as well as the Age-adjusted Death Rate (ADR).

Age-adjusted Death Rate gives the number of deaths per 100,000 population. This is a way to standardize death rates to minimize the effects of differences in age compositions when comparing the death rates for different populations (e.g. Allen County vs. Ohio).

Life Expectancy: Life expectancy is the average expected number of years of life remaining from a given age, in a given population, according to the current mortality experience (age-specific death rates) of persons in the same population. Life expectancy is expressed as the life expectancy from birth.

²MATERNAL & CHILD HEALTH

Source:

Ohio Department of Health Vital Statistics Data, 2015, Analyzed by Allen County Public Health

Notes:

Infant Mortality Rate is the number of deaths to infants under 1 year of age (364 days and younger) per 1,000 live births in a given year.

10-year average annual infant mortality rate is the total infant death rate average from 2006-2015. Rate is per 1,000 live births.

Teen Birth Rate is the number of births per 1,000 females ages 15-17 years.

Low Birth Weight Birth: A low birth weight birth is a birth of a baby who weighs less than 2,500 grams.

³COMMUNICABLE DISEASE

Source:

Syphilis, Chlamydia, and Gonorrhea: Ohio Department of Health Sexually Transmitted Disease Data and Statistics, 2015

HIV/AIDS: Ohio Department of Health Surveillance Statistics, 2015

Notes:

The incidence rate is reported for Syphilis (primary and secondary cases

³COMMUNICABLE DISEASE continued

combined), Chlamydia, Gonorrhea, and the diagnosis of HIV infections.

The incidence rate is the number of new cases reported in a given year per 100,000 population. This information may include persons younger than 18 years of age.

The prevalence rate is reported for persons living with HIV/AIDS. This represents all persons ever diagnosed and reported with HIV/AIDS who have not been reported as having died as of December 31, 2015. The rate is the number of person per 100,000 population.

⁴UNHEALTHY BEHAVIORS & CONDITIONS

Source:

Allen County Community Health Assessment, 2014

Notes:

This community health assessment provides an overview of health-related data for Allen County adults (19 years and older) who participated in a county-wide health assessment survey during 2014.

Obesity in individuals is classified by body mass index (BMI), which is a measure of body fat based on height and weight.

Indicators are the percent of adults ages 19 and older reporting these behaviors and conditions.

⁵INSURANCE STATUS

Source:

U.S Census Bureau, 2015 American Community Survey (ACS), 1 year estimates

Notes:

Percent of adults ages 18-64 who are uninsured. Includes those in labor force, unemployed, and not in the labor force.
