

Environmental Citizens Advisory Committee
Minutes of January 19, 2016 — Page 1 of 1

Place/Time:	Allen County Health Department, January 19, 2016, 3:00 pm.	1
		2
Members Present:	Kathy Luhn, Mike Edmiston, Steve Kayatin, Bill Kelly, Gary Sheely, Tom Berger, Eric Getz, Thom Mazur, Michael Wildermuth.	3
		4
		5
Others Present:	INEOS: Joe Bianco. ISP: Duy Pham.	6
		7
Approval of Minutes:		8
		9
	<ul style="list-style-type: none">The minutes for the October 20, 2015 meeting were approved as distributed.	10
		11
Industry Status Reports:		12
		13
	<ul style="list-style-type: none">INEOS (Joe Bianco)	14
	— INEOS will be called INEOS Nitriles USA	15
	— In the past there were three divisions...	16
	— Nitriles Division (continuing in Lima, manufacturing acrylonitrile and acetonitrile)	17
	— Catalyst Division (continuing in Lima, manufacturing catalyst for the production of nitriles)	18
	— Borex Division (now dropped from INEOS product line; Lima plant will close if not sold)	19
	— A printed report was distributed.	20
	— Joe reported that several-hundred-thousand dollars have been spent to increase plant security. Much of this money went into cameras which mostly monitor the fence line.	21
		22
	<ul style="list-style-type: none">ISP (Duy Pham)	23
	— A printed report was distributed.	24
	— Duy pointed out the item stating that testing for carbon monoxide emissions from a unit showed that the CO emissions were within permitted limits.	25
		26
	— Duy reported that a leak at a flange on a butane line was discovered as part of the LDAR program (Leak Detection And Repair). During the repair process some butane had to be sent to the flare, and this resulted in visible changes at the flare that some citizens may have noticed.	27
		28
		29
	<ul style="list-style-type: none">Husky	30
	— A printed report was distributed. There was no discussion.	31
		32
	<ul style="list-style-type: none">OEPA (Eric Getz)	32
	— A printed report was distributed.	33
	— There was a brief discussion as to whether non-inspected entities (small businesses, churches, schools, and even individual citizens) properly dispose of environmentally-hazardous waste such as fluorescent light bulbs, asbestos, paint, etc. Basically everyone should be disposing of these things properly, but there is no easy way to determine the level of compliance.	34
