CHILD FORMULAS

Milk-Based, Blenderized Food Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Compleat Pediatric	For children requiring tube feeding made from real blenderized foods.			8.45 oz
Compleat Pediatric Reduced Calorie	For children requiring tube feeding made from real blenderized foods. Reduced calorie for decreased energy needs.			8.45 oz

Milk-Based, Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Boost Kid Essentials 1.0 Cal (retail)	Intact protein, lactose-free, gluten-free formula for children requiring oral supplementation.			8.25 oz
PediaSure	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8 oz
PediaSure Enteral	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8 oz
PediaSure with Fiber	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8 oz
PediaSure with Fiber Enteral	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8 oz
Nutren Junior	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8.45 oz
Nutren Junior with Fiber	Intact protein, lactose-free, gluten-free formula for children requiring tube feeding, full diet or oral supplementation.			8.45 oz

Milk-Based, High Calorie Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Boost Kid Essentials 1.5 Cal	Nutritionally complete, intact protein, lactose-free, gluten free formula for children requiring higher calorie needs and tube feeding, full diet or oral supplementation.			8 oz

Milk-Based, High Calorie Pediatric Formulas: (continued)				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Boost Kid Essentials 1.5 Cal with Fiber	Nutritionally complete, intact protein, lactose-free, gluten free formula with fiber for children requiring higher calorie needs and tube feeding, full diet or oral supplementation.			8 oz
PediaSure 1.5 Cal	Nutritionally complete, intact protein, lactose-free, gluten-free formula for children requiring higher calorie needs and tube feeding, full diet or oral supplementation.			8 oz
PediaSure 1.5 Cal with Fiber	Nutritionally complete, intact protein, lactose-free, gluten-free formula with fiber for children requiring higher calorie needs and tube feeding, full diet or oral supplementation.			8 oz

Soy-Based Pediatric Formula:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Bright Beginnings Soy Pediatric Drink	Nutritionally complete, gluten-free formula for children requiring tube feeding, full diet or oral supplementation. NOT to replace soy milk unless medically warranted.			8 oz

Peptide-Based Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
PediaSure Peptide	Nutritionally complete, lactose-free formula for children with gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8 oz
Peptamen Junior	Nutritionally complete, lactose-free formula for children with gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8.45 oz
Peptamen Junior with Fiber	Nutritionally complete, lactose-free formula with fiber for children with gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8.45 oz
Peptamen Junior with Prebio ¹	Nutritionally complete, lactose-free formula with prebiotics for children with gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8.45 oz

Peptide-Based, High Calorie Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
PediaSure Peptide 1.5 Cal	Nutritionally complete, lactose-free formula for children with higher calorie needs and gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8 oz
Peptamen Junior 1.5 Cal	Nutritionally complete, lactose-free formula for children with higher calorie needs and gastrointestinal impairment and/or malabsorption requiring tube feeding, full diet, or oral supplementation.			8.45 oz

Hypoallergenic Pediatric Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Alfamino Junior	Amino acid based, nutritionally complete formula with 65% of fat as MCT for children with cow's milk protein allergy, multiple food allergies, or malabsorption/maldigestion issues requiring tube feeding, full diet, or oral supplementation.	14.1 oz		
EleCare Junior	Amino acid based, nutritionally complete formula with 33% of fat as MCT for children with severe food allergies, gastrointestinal impairment, or malabsorption requiring tube feeding, full diet, or oral supplementation.	14.1 oz		
Neocate Junior	Amino acid based, nutritionally complete formula with 35% of fat as MCT for children with severe food allergies, gastrointestinal impairment, or malabsorption requiring tube feeding, full diet, or oral supplementation.	14.1 oz		
Neocate Junior with Prebiotics	Amino acid based, nutritionally complete formula with 35% of fat as MCT and prebiotics for children with severe food allergies, gastrointestinal impairment, or malabsorption.	14.1 oz		
Neocate Splash	Amino acid based, nutritionally complete formula with 35% of fat as MCT for children with severe food allergies, gastrointestinal impairment, or malabsorption requiring tube feeding, full diet, or oral supplementation.	14.1 oz		
PurAmino Junior	Amino acid-based, nutritionally complete formula with 33% of fat as MCT for children with severe cow's milk allergy, multiple food allergies, or other gastrointestinal conditions requiring tube feeding, full diet, or oral supplementation.	14.1 oz		

Hypoallergenic Medical Food:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Neocate Nutra	Amino acid-based semi-solid medical food for infants \geq 6 months and children with cow milk or soy protein sensitivity, gastrointestinal impairment, sensitivity to extensively hydrolyzed proteins, and severe food allergies. Not intended for use in a bottle or tube feed. Not suitable as a sole source of nutrition.	14.1 oz		

CHILD AND ADULT FORMULAS

Clear Liquid Formula:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Boost Breeze	Fruit flavored, low fat and lactose, and gluten-free formula for children or women with fat malabsorption or need for clear liquid diet. Not nutritionally complete. Not for tube feeding.			8 oz

Milk-based Child and Adult Formula:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Carnation Breakfast Essentials	Nutritionally complete, milk-based formula for women and children requiring oral supplementation. Not for tube feeding.			8 oz

Caloric Additive:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Super Soluble Duocal	Energy enhancer that is completely soluble in water, liquids, and moist foods without altering taste, indicated for children and women with disorders of protein and amino acid metabolism, protein or electrolyte restricted diets, or high energy diets (i.e., FTT) requiring tube feeding, full diet, or oral supplementation.	14 oz		

ADULT FORMULAS

Milk-based Adult Formulas:				
Product Name	Indications for Use	Powder	Concentrate	Ready to Feed
Boost	Nutritionally complete, lactose and gluten-free formula for women with increased calorie needs requiring tube feeding, full diet, or oral supplementation.			8 oz
Ensure	Nutritionally complete, lactose and gluten-free formula for women with increased calorie needs requiring tube feeding, full diet, or oral supplementation.			8 oz
