

# COVID-19 Vaccine Booster Shots

If you have been vaccinated against COVID-19, you may be eligible for a booster dose. Check below to find out if you qualify.

| Initial Vaccination |                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                  |

|                     | Johnson & Johnson                                                                                                                                                                                       | Moderna or Pfizer/Comirnaty                                                                                                                                                                                                                                                                                                                                                                      |
| When                | Two months after single dose.                                                                                                                                                                           | Six months after second dose.                                                                                                                                                                                                                                                                                                                                                                    |
| Who                 | <ul style="list-style-type: none"><li>▶ 18 or older.</li></ul>                                                                                                                                          | <ul style="list-style-type: none"><li>▶ 65 or older.</li><li>▶ 18 or older with <b>underlying health condition</b>.</li><li>▶ 18 or older living in <b>long-term care setting</b> (such as a nursing home).</li><li>▶ 18 or older <b>living in a high-risk setting</b> (such as a group home, jail, or homeless shelter).</li><li>▶ 18 or older <b>working in a high-risk setting</b>.</li></ul> |
| Booster Options     | If you're eligible, you can choose which vaccine you receive as a booster dose. Some people may prefer the vaccine type that they originally received and others may prefer to get a different booster. |                                                                                                                                                                                                                                                                                                                                                                                                  |

**Note:** If you have received a third/additional dose of the Moderna or Pfizer/Comirnaty vaccine because you are immunocompromised, you should NOT get a booster dose. No one should receive more than three doses of these vaccines at this time.
